Phishing Email Analysis Report

Phishing Indicators Report

1. Sender Email Spoofing:

   - Displayed sender: PayPal <secure@paypall.com>

   - Real domain should be paypal.com, not paypall.com -> spelling mistake = fake.

2. Urgent / Threatening Language:

   - "Urgent Action Required"

   - "Failure to comply within 24 hours will result in permanent account closure"

   - Common phishing tactic to trigger panic.

3. Suspicious Link:

   - Visible: "Verify Now"

   - Actual URL: http://paypal.verification-update.com

   - Not a real PayPal domain.

4. Mismatched URL (Hover Reveal):

   - Hovering over link shows a totally different domain - classic phishing trick.

5. Spelling/Grammar Errors:

   - Minor error in domain (paypall.com)

   - Sentence structures seem auto-generated/formal

6. No Personalization:

   - Says "Dear Customer" instead of your real name -> generic.

7. Fake Branding:

   - Uses PayPal name but lacks official styling, logos, or footer.

8. No HTTPS in URL:

   - http:// instead of https:// -> unsafe and not secure.

Conclusion:

This email shows multiple red flags and is a clear phishing attempt.
